ABILASCH VIJIKARAN

AI Engineer

London, UK | linkedin.com/in/abilasch-vijikaran-117aa824a | github.com/abilaschvijikaran-creator

PROFILE

AWS Certified AI Practitioner completing a year-long Certified AI Engineer Traineeship. I have fine-tuned a BART language model and deployed it as a live, Dockerised REST API on AWS EC2 (ROUGE-1 F1 0.61, twice the target), and built a ResNet50 visual search web app with PyTorch and Streamlit. Skilled in Python, PyTorch, Hugging Face and TensorFlow, with a habit of testing models for bias rather than trusting a single metric.

AI PROJECTS

Radiology Report Summariser: Fine-tuned LLM with live API 2026

Python · Hugging Face Transformers · BART · Flask · Docker · Gunicorn · AWS EC2

- Fine-tuned *facebook/bart-base* on 2,393 chest X-ray findings and impression pairs to generate concise radiology summaries.
- Achieved ROUGE-1 F1 of 0.61 on held-out test data (ROUGE-2 0.52, ROUGE-L 0.60) against a 0.30 target.
- Deployed as a live REST API with a single POST endpoint and error handling, in a Docker container served by Gunicorn on AWS EC2.
- Found majority-class bias through manual testing (the model defaulted to "no acute findings" on abnormal reports); documented the limitation and proposed rebalancing and clinically aware evaluation.

Visual Fashion Recommender: Computer Vision web app 2026

Python · PyTorch · torchvision · ResNet50 · Streamlit · Hugging Face

- Built an image search tool that turns clothing photos into ResNet50 embeddings and returns the most visually similar products using cosine similarity.
- Cleaned a rental-clothing image dataset by removing invalid and duplicate images, and built a torchvision transformation pipeline.
- Deployed on Streamlit Community Cloud with embeddings hosted on Hugging Face; users upload a photo and get the top 5 matches with scores. On a T-shirt test image, all five matches scored 0.90–0.91 (target 0.7).

SKILLS

Languages	Python, SQL, R, JavaScript, HTML, CSS
AI and ML	Machine learning, deep learning, NLP, computer vision, LLM fine-tuning, OpenAI API (fine-tuning, Assistants, embeddings), PyTorch, torchvision, Hugging Face Transformers, TensorFlow
Data	pandas, NumPy, statistics and probability, data cleaning and preparation
Deployment	Flask, Streamlit, REST APIs, Docker, Gunicorn, AWS EC2, Git and GitHub, command line

CERTIFICATIONS

AWS Certified AI Practitioner, Amazon Web Services Aug 2026

EDUCATION AND TRAINING

Certified AI Engineer Traineeship, IT Career Switch Oct 2025 – Oct 2026

Machine learning, deep learning (CNNs, RNNs), NLP, computer vision, MLOps, Git. Completed 33 Codecademy courses and two industry-based AI projects.

Business Management, University of Westminster 2025 – Present

Foundation year completed; currently in Year 1.

Psychology, Middlesex University 2024 – 2025

A-levels, Canons Sixth Form 2022 – 2024

A-levels at grades C–D

GCSEs, Park High School 2017 – 2022

GCSEs at grades 4–6

WORK EXPERIENCE

Picker (part-time), Iceland Nov 2025 – May 2026

- Picked and prepared customer orders for home-delivery drivers, accurately and on time.
- Unloaded pallets of stock from delivery lorries and helped teammates finish their tasks faster.
